### D-13 AUTOMATIC MACHINE DISHWASHING

**POWDER** is a high grade dishwashing powder for use in commercial automatic dishwashers. Its active soil and grease cutting agents are halogenated to bleach and remove stains. **D-13** may be used on aluminum, stainless, glass, china and plastic.

**Application:** For best results, read and follow the manufacturer's instruction booklet supplied with your machine. Maintain water temperature between 140–160°F. Place dishes so they receive full force of the water spray. Where applicable, fill each dispenser cup in your machine, or place 1 ½ -2 tablespoons of **D-13** in the bottom of your dishwasher. Add slightly more for pots and pans or hard water. For heavily soiled dishes, presoak for up to one hour using 46 ounces of **D-13** per gallon of hot water. To improve rinsing and reduce spotting and film formation, use Arcot # 9682 LAST DROP Rinsing & Drying Agent.
