Oxy-57 is an effective hard surface cleaner and fabric and carpet prespotter that removes oil, grease, dirt, syrups, fats, various types of soils, pet stains and most food stains. It is an excellent industrial and commercial cleaner of equipment, tools and parts, food processing plants and kitchens, and restroom facilities.

APPLICATION: Product is safe for use in USDA regulated establishments. Before use, food products and packaging materials must be removed from the room or carefully protected. After use, all surfaces must be thoroughly rinsed with potable water. Always spot test an inconspicuous area, especially for sensitive surfaces or if product is being used for the first time. Use only if there are no negative effects or discoloration.

As a hard surface cleaner: may be used by spraying, brushing, wiping, mopping or pressure washing. Dilutions will vary from 1:8 to 1:128 (1oz. to 16oz. per gallon of water), depending on the application method and the severity of soil.

As a spot remover: highly effective spot remover for carpet, upholstery, curtains, sheets, towels, shirts and virtually any fabric not harmed by water alone. Spray directly on stain. Allow to stand for 30 seconds. Agitate with a clean white brush. Wait for another 30 seconds. Remove the dissolved soil and chemical completely by wiping with a clean white towel, by laundering the fabric or shampooing the carpet. Dilutions will vary from straight to 1:20 depending on the application method and the severity of soil. Remove chemical residues completely.
